Summary ——————————————————————————————————

I'm an aspiring frontend developer, with a passion for creating visually appealing and user-friendly websites and applications. I am dedicated to mastering web development technologies such as HTML, CSS, JavaScript and REACT, with a focus on responsive design and accessibility. As an aspiring frontend developer, I strive to seamlessly integrate functionality and aesthetics, delivering an optimal user experience.

Experience ——————————————————————————————————

Frontend Developer Internship | Certificate   Nov 2022 - Current
- Transformed a completely static HTML, CSS, JavaScript and React single page application into an interactive user interface using animations, transitions and carousels.
- Processed API requests with Axios to dynamically represent data from a cloud server and represented it through skeleton loading states, pagination and dynamic routing
- Utilized Git version control and the GitHub interface to work and thrive in a virtual and collaborative team environment

Freeland Frontend Developer | Self Employed   Oct 2022 - End Date
- Delivered professional websites using HTML5, CSS3 (+SCSS, BEM), JavaScript and React best practices
- Improved website performance by compressing, caching and lazy loading images and components
- Included SEO, responsive, multi-platform and hosting support, enabling their website to be used by any browser or device in the world

Frontend Developer Support | Frontend Simplified   Sep 2022 - End Date
- Supported 1,000+ students using HTML, CSS, Flexbox, JavaScript and React best practices
- Utilized debugging best practices using Google Chrome inspect element tooling
- Simplified difficult programming concepts including responsive website development, CSS layout, Promises and API requests

Projects ——————————————————————————————————

G-mail Clone | Website | GitHub
- This is a G-mail clone created using HTML, CSS, JavaScript and Redux. It provides users with a familiar interface to manage their emails efficiently.

Library | Website | GitHub
- Integrated Google's API to create a real-world search engine that offers fast and accurate search results for the web.

Movie Database Clone | Website | GitHub
- Integrated HTML, CSS, JavaScript to allow users to search and brows a collection of films. The database is frequently updated with new films and information.
