Summary ——————————————————————————————————————

I'm a frontend developer with a passion for creating visually appealing and user-friendly website and applications. I focus on mastering web development technologies such as HTML, CSS, JavaScript and REACT, wit ha keen eye for responsive design and accessibility. Let's work together to create an exceptional user experience!

Experience ——————————————————————————————————

Frontend Developer Internship | Certificate   Nov 2022 - Current
- Transformed a completely static HTML, CSS, JavaScript and React single page application into an interactive user interface using animations, transitions and carousels.
- Processed API requests with Axios to dynamically represent data from a cloud server and represented it through skeleton loading states, pagination and dynamic routing
- Utilized Git version control and the GitHub interface to work and thrive in a virtual and collaborative team environment

Freelance Frontend Developer | Self Employed   Oct 2022 - End Date
- Delivered professional websites using HTML5, CSS3 (+SCSS, BEM), JavaScript and React best practices
- Improved website performance by compressing, caching and lazy loading images and components
- Included SEO, responsive, multi-platform and hosting support, enabling their website to be used by any browser or device in the world

Frontend Developer Support | Frontend Simplified   Sep 2022 - End Date
- Supported 1,000+ students using HTML, CSS, Flexbox, JavaScript and React best practices
- Utilized debugging best practices using Google Chrome inspect element tooling
- Simplified difficult programming concepts including responsive website development, CSS layout, Promises and API requests

Projects ——————————————————————————————————

G-mail Clone | **Website** | **GitHub**
- This is a G-mail clone created using HTML, CSS, JavaScript and Redux. It provides users with a familiar interface to manage their emails efficiently.

Library | **Website** | **GitHub**
- Integrated Google's API to create a real-world search engine that offers fast and accurate search results for the web.

Movie Database Clone | **Website** | **GitHub**
- Integrated HTML, CSS, JavaScript to allow users to search and brows a collection of films. The database is frequently updated with new films and information.
